Address Rosario, Cavite **Phone** +639954853868 **Github** [BNJ28\(Benjie\) - GitHub](#) **E-mail** Lipalambenjie@gmail.com

Specializing in responsive web applications. Expert in building modern user interfaces using Vue.js, JavaScript, HTML5, CSS3, and Vite. Experienced in database systems and object-oriented programming (C++ / Java).

EDUCATION

- 2022 – 2026

Cavite State University CCAT–Campus
Bachelor of Science in Computer Science
- 2021 – 2022

Noveleta Senior High School
TVL – Information and Communications Technology (ICT) Strand

PROJECTS

- Automotive Spare Parts DSS (Vue.js / Web Application)**
 - Designed and coded a comprehensive forecasting and restocking recommendation prototype for automotive inventory.
 - Implemented statistical forecasting models, developed responsive frontend dashboard views, and built automated alerts to optimize restocking efficiency and reduce stockouts.
- Daily Life Tracking System (Vue.js / Web Application)**
 - Programmed a productivity platform to log and track personal routines.
 - Built reactive visualization widgets and responsive charts to help users review habit completion logs and analyze daily schedules.
- Personalized Banking System (Java)**
 - Developed a personal account system that allows users to deposit and withdraw funds, maintaining unique balances per account.
 - Implemented account creation and simple authentication logic.
- Pesoplay Gaming Platform (Pure C++)**
 - Engineered in-game currency system for skin purchases and account top-ups.
 - Implemented secure wallet management using encapsulation and class inheritance.
 - Developed file-based data persistence for player inventories and balances.
 - Designed console interface with menu-driven navigation system.

SKILLS

- Programming Languages:** Java, JavaScript, HTML, CSS, C++
- Frameworks/Libraries:** Standard C++ libraries, Java libraries, Vue.js, Vite, Tailwind CSS
- IDEs & Tools:** VSCode (Main), Git, GitHub, CodeBlocks, Netbeans, Eclipse
