PROFESSIONAL SUMMARY

Computer Science graduate focused on frontend engineering, UI/UX design, and practical automation. Builds responsive Vue and React interfaces, AI-assisted n8n workflows, and operational dashboards that turn complex processes into clear user experiences.

EDUCATION

Cavite State University - CCAT Campus
Bachelor of Science in Computer Science

2022 - 2026

SELECTED PROJECTS

Flowboard Systems Monitor | JavaScript, Firebase, n8n, Vite

- Built a dark operations dashboard separating automation telemetry from website uptime monitoring across thirteen registered systems.
- Added availability checks, response-time reporting, activity history, workflow links, and Firebase-ready execution telemetry without exposing credentials.

Portfolio AI Assistant | Vue 3, n8n, Gemini, Firebase

- Created a scoped portfolio assistant powered by n8n and Gemini, with visitor sessions organized in a private Firebase inbox.
- Designed the responsive chat interface, safe failure states, suggestion prompts, and human-review visibility.

AI Recruiter Agent | n8n, Gemini API, Google Sheets, Gmail API

- Built a workflow that reads incoming applications and PDF resumes, evaluates candidate context with Gemini, and maintains structured candidate records.
- Designed safe routing for incomplete applications, interview drafts, spam handling, and cases requiring human review.

Automotive Spare Parts DSS (Team Thesis) | React, TypeScript

- Developed and refined responsive frontend views, contributed to the visual direction, and tested key user flows as part of a three-person team.

MNL Lumiere Streetwear Web Application | React, Vite, Firebase

- Built a responsive e-commerce-style website with a focused storefront, visual identity system, and mobile-friendly product browsing experience.

Daily Life Tracking System | Vue 3, Firebase, Pinia

- Built a responsive productivity platform with routine, habit, finance, and workout tracking plus reactive visualizations.

SKILLS

Frontend: JavaScript, TypeScript, HTML5, CSS3, Vue 3, React, Vite, Tailwind CSS, responsive UI

Backend and Data: Node.js, Express.js, Firebase, Firestore, PostgreSQL, REST APIs

AI and Automation: n8n, Google Gemini API, Gmail API, Google Sheets, workflow observability, human-review routing

Design and Delivery: Figma, UI/UX design, Git, GitHub, Vercel, Railway, functional testing
